Index

Acquired behavior, 139–146, 178
Acquired characteristics, inheritance of, 154, 180, 219, 236
Darwin’s use of 151–152
and instincts, 115–118, 119, 120–121
Adaptation and Natural Selection (Williams), 131
Adaptations, maladaptive, 164–165
Age of earth, 152–153
Aiming of antiaircraft guns, negative-feedback systems for, 63
Alexander, Richard, 147
Altruism, 130–132, 150, 172
Altruism, reciprocal, 131–132, 134, 150, 172
of baboons, 134
American Society for Cybernetics, 74
Among- and within-organism selection, complementarity of, 193–198
Amplifiers, negative-feedback, for telephone signals, 62–63
Analog vs. digital computers, 74
Animism, 15–16, 45
Anti-aircraft gun aiming, negative-feedback systems for, 63
Antibodies and antigens, 178–181, 232
Aquinas, Thomas, 113, 114
Archimedes, 59
Aristotle
antimaterialism of, 26
environmentalism of, 17–18
on instinctive animal behavior, 113, 114
On the Heavens, 18
panpsychic physics of, 45
Physics, 17
teleology of, 25, 27
Arm 1 computer program, 98–100, 235
“Arms races,” evolutionary, 8
Arm 2 computer program, 100
Artificial intelligence, 74
Artificial selection, 120, 205–206
Assemblies, cell, 42, 43
Atheism, 27
Baboons, reciprocal altruism of, 134
Bain, Alexander, 181
Baldwin, James Mark, 181
Ballistic behavior, 102–104
Bates, Elizabeth, 231
Bateson, Gregory, 263
Bats, kin selection of, 133
Beetles, burying, instinctive behavior of, 123–124
Behavior, 14
acquired, 139–146, 178
altruistic, 130–132, 150, 172
ballistic, 102–104
cooperative, 130–132
goal-directed, 55
human, and natural selection, 147–152, 175
learned, 139–146, 178
Behavior (cont.)
maladaptive, 129
molar vs. molecular, 39
purposeful, 5–6, 55, 64, 67
ultimate causes of, 105–107
“useless”, 129
voluntary, 24, 43
Behavioral flexibility problem, 209
Behavioral illusion, 88, 127, 174, 225
Behavioral science, applied, lack of progress in, 2
Behaviorism, 34–35, 38–41, 178
Behavior: The Control of Perception (Powers), 75
Behe, M., 264
Bell Curve, The (Herrnstein and Murray), 169
Bell Laboratories, 62
Bernard, Claude, 59, 67, 80–81
on autonomic nervous system, 64
findings disregarded by behavioral scientists, 3
Introduction à l'étude de la medicine experimentale (Bernard), 51
lessons of, 8–10, 198, 201, 203, 217, 218, 223, 241, 242, 253, 258, 262
on organismic regulation, 5–6, 51–55, 56
Bernhard, Gary, 255–256
Primates in the Classroom, 255
Beyond Freedom and Dignity (Skinner), 224
Bigelow, Julian, 44, 63–64, 67, 75, 263
Birds, sexual selection of, 135
Bittacus apicalis, sexual selection of, 134–135
Black, Harold S., 62–63
Blending inheritance, 153
Blindwatchmaker, 203
Blood chemistry, regulation of, 52–53, 54–55, 57, 64
Bloom, Paul, 230
Body temperature regulation, 64, 81–82
Bourbon, W. T., 264
Brain as Darwin machine, 192
Breeding of cattle, 120
Breeding of plants and animals, 205, 206
Breland, Keller and Marian, 142
Bride price, 161, 167
Brood parasites, 162–163
Brougham, Henry Lord, 118
Brown, Donald, 167
Human Universals, 167
Bubbles seeking water surface, 33–34
Bullfrogs, sexual selection of, 135
Burnet, Sir Frank Macfarlane, 180
Burying beetles, instinctive behavior of, 123–124
Buss, D. M., 264
Byzantine oil lamp, 62
Caddis fly larvae, instinctive behavior of, 123
Calvin, William, 102–103, 192
Camouflage of tree frogs, 6–7
Campbell, Donald T., 183–188, 194, 213, 224, 229
Campbellian creatures, 229
Cannon, Walter, 55–58, 59, 63, 64, 67
Wisdom of the Body, The, 55, 67
Carbonic acid, blood, regulation of, 57
Carcinus maenas, instinctive behavior of, 124
Cattle, breeding of, 120
Causality, psychic, 32
Cause-effect phenomena, reflexes as, 21–22
Cause-effect theories, 4, 37, 44, 54, 57
vs. cybernetics, 65
vs. evolution, 7
and failure of cybernetics, 74–75
incapable of accounting for purposive behavior, 174
Newton’s second law as example of, 4
rejection of, 105
Cause-effect trap, 237–239
Causes, ultimate, of behavior, 105–107
Index  281

Celibacy, 249
Cell assemblies, 42, 43
Characteristics, acquired, inheritance of, 154, 180, 219, 236
Darwin’s use of 151–152 and instincts, 115–118, 119, 120–121
Chemistry blood, regulation of, 52–53, 54–55, 57, 64 combinatorial, 205
Chomsky, Noam, 208, 226–228, 230, 238, 265 as anti-Darwinian, 183 and lessons of Darwin and Bernard, 226–228 on mechanistic nature of behavioral science, 217 review of Skinner’s Verbal Behavior, 183, 226
Churchland, Paul M., 239
Circular causality, 6, 7–8, 44, 61
Clark, Robert D., 75
Classical conditioning, 35, 140, 212
Clock, water, of Ktesibios, 59–60
Clonal selection theory of antibody production, 180
Closed-loop systems, 6, 44
Coefficients, correlation, 91–92
Cognitive coherence, 221
Cognitive Darwinism, 183–188
Cognitive psychology, 41–45, 208–209
Coherence, cognitive, 221
Coin game demonstration, 104–105
Combinatorial chemistry, 205
Community selection, 120–121
Comparators, 68–69, 76–77
Compensatory tracking, 90
Complementarity of among- and within-organism selection, 193–198
Computer programs demonstrating perceptual control Arm 1, 98–100, 235
Arm 2, 100
Demo 1, 89–91, 92–94, 243
Demo 2, 96–97
Find Mind, 95
Gather 100–101, 263
Mind Reading, 94–95
Spreadsheet Model of a Hierarchy of Control Systems, 245
target-pointing, 98–100, 235
Test of the Controlled Variable, 243
Computers, analog vs. digital, 74
Conditioning, classical, Pavlovian, or respondent, 35, 140, 212
Conditioning, operant, 36, 37–38, 39, 208, 212, 223–224
Consciousness allowing vicarious variation and selection, 186
Consciousness Explained (Dennett), 228
Control by organisms, 5–6, 52–54
Controlled variables, 76–77
Control systems, 6, 44, 71–75, 233 diagrams, 77, 80
Control Systems Group World Wide Web site, 265
Cooperative behavior, 130–132
Correlation coefficients, 91–92
Cosmides, Leda, 147, 164, 174, 239, 249
Countercontrol, 252–253
Creativity, human, 187–188, 233
Creatures, Campbellian and Popperian, 229
Crickets, Mormon, sexual selection of, 135
Cruise control system, automobile, 68–72, 77–79
Cuckoos, egg-dumping behavior of, 162–163
Curie, Marie, 55
Cybernetics, 6, 44, 233 definition, 65 history of, 63–65, 73–75 meetings, 74 on purposeful systems, 70
Cybernetics (Wiener), 64, 67, 68
Cziko, Gary, 265
Without Miracles, 8
Darwin, Charles Robert, 46, 51, 52, 255–258, 262
on artificial selection, 201
on behavior, 147–152
on continuity of living organisms, 18
*The Descent of Man and Selection in Relation to Sex*, 132, 148
on evolution of instincts, 118–121

Pinker, Steven, 167, 230–237, 238, 245
and dualism, 234
How the Mind Works, 230, 231, 234, 237
The Language Instinct, 230
and lessons of Darwin and Bernard, 235–237
Pitts, Walter, 263
Plato, 17, 25, 18, 45
Phaedo, 17
Plotkin, Henry C., 177
Poincaré, Henri, 182
Pointing to target, computer programs modelling, 98–100
Popper, Karl, 258
Popperian creatures, 229
Positive feedback, 61, 141
Powers, William T., 9, 83, 84, 201, 230, 263
on behavioral illusion, 67, 88
on behavior as the control of perception, 75–76, 242
Behavior: The Control of Perception, 75
demonstrations by, 87, 95, 96, 98, 100, 104, 235, 243
on evolution, 238
and lessons of Darwin and Bernard, 238, 245
on punishments, 241
on reorganization, 145
on rewards, 252, 241
Preformationism, 23–24
Pressure, blood, regulation of, 64
Price, bride, 161, 167
Primates in the Classroom (Bernhard), 255
Principles of Psychology (James), 33–34
Problem of behavioral flexibility, 209
Processes, mediating, 41
Proprioception, 103–104
Providentialism, 114, 115
Proximate vs. ultimate explanations, 112
Psychic causality, 32
Psychic theories of behavior, 14–20, 45
Psychology
cognitive, 41–45, 208–209
evolutionary, 162–172
Punished by Rewards (Kohn), 250
Punishments, 241, 251–252
Purposeful behavior, 5–6, 9, 55, 64, 67, 68–72
Purposeful evolution, 203–206
Purpose in feedback-control systems, 76–78
Purpose tremor, 67
Puzzle boxes, 35, 37, 39, 144
Radical behaviorism, 36
Ratios, waist-to-hip, 160
Rats, instincts of, 128
Reciprocal altruism, 131–132, 134, 150, 172
of baboons, 134
Reference levels, 71
Reference signals, 82–83, 105–107
Reflexes, 21–22, 35
Regulation by organisms, 5–6
of blood chemistry, 52–53, 54–55, 57, 64
of body temperature, 64, 81–82
Reinforcement, 36, 38
Reinforcement illusion, 225
Remote Associations Test, 187
Reorganization, 145–146, 210–213
Respondent conditioning, 35, 140, 212
Responsible Thinking Process, 253–255
Reverse or inverse dynamics and kinematics, 99, 234, 246
Rewards, 250–252
Rheostasis, 58, 81
Rheostat, 263
Roberts, Billy, 147

Speed control, automobile, 77–79
Speed governor for steam engines, 62
Spiders, web-spinning behavior of, 137–138
Spreadsheet Model of a Hierarchy of Control Systems computer program, 245
Squirrels, ground, altruistic behavior of, 130
Stalin, Joseph, 264
Steam engine speed governors, 62
Stimulus, 18
Stimulus-computation-response theories, 44, 178, 209, 211
Stimulus-organism-response theories, 42–43, 45
Stimulus-response theories, 21–22, 35
Stomach functions and selectionism, 232
Stuttering triplet example, 170–171
Subjective vs. objective measures of behavior, 83–86
Sugar, blood, regulation of, 52–53, 54–55
Summerhill (Neill), 258
“Summertime” (song), 147
Synapse and neuron elimination in brain development, 189–192
Synaptic blooming and pruning in brains of rats and monkeys, 191
Synaptic selection, 231–232
Système de la nature (Holbach), 27
Target-pointing computer programs, 98–100
Teilhard de Chardin, Pierre, 19
Teleology, 18, 25
Telephone signals, negative-feedback amplifiers for, 62–63
Temperature, body, regulation of, 56, 81–82
Template theory of antibody production, 179–180
Test of the controlled variable, 84–85, 243–244
computer program, 243
Thalhammer, Bryan, 263
Thermostat, 69
Thorndike, Edward, 35–36, 37, 140, 144, 178, 182, 183, 211
Throwing disturbance demonstration, 103–104
Tinbergen, Nikolaas, 124
Toilet flushing mechanism, 60–62, 68
Tolman, Edward C., 38–41
Tooby, John, 164, 174, 239, 249
Tracking, compensatory, 90
Trap, cause-effect, 237–239
Tree frogs, camouflage of, 6–7
Tremor, purpose, 67
Triplet, stuttering, example, 170–171
Trivers, Robert, 131–132, 154, 155
Tucker, Charles, 100
Tylor, Sir Edward Burnett, 16
Ultimate causes of behavior, 105–107
Ultimate vs. proximate explanations, 112, 164
Umweg task, 184
Uncertain futures problem, 177–178
Unified theory of behavior, 258–262
Universal grammar, 226
“Useless” behavior, 129
Vampire bat, altruistic behavior of, 130
Vampire finch behavior, 119
Variables, controlled, 76–77
Variation and selection in behavior, 146
Variation and selective retention processes, 6–8
Verbal Behavior (Skinner), 183, 226
Vicarious selection processes, 184–186, 213, 224
Visual system, development of, 190
Visuomotor coordination, 234–235
Vitalism, 23–24
Vitamin D, 264
Voluntaristic psychology, 32–33
Voluntary behavior, 24, 43
Waddington, C. H., 19, 20
Waist-to-hip ratios, 160
Wallace, Alfred Russel, 149–150, 152
Wasp behavior, 118, 120
Watchmaker, blind, 203
Water clock of Ktesibios, 59–60
